

Nonlinearcircuits Builder's list (16/2/2023)

A few points to mention:

I know some of these people and some I don't. Their inclusion on this list is not an endorsement from me, they simply let me know they were willing to build and sell assembled modules. If I do hear about some issues with any builder, I will remove them from the list.

Any transaction you make is between you and the builder, NLC is not involved.

So be sure to work out a few things first –

Price

Shipping cost

Warranty

Payment method (do not use paypal Family & Friends, unless you know the builder)

What happens if the item goes missing in the post – post insurance?

Build and Delivery time (keep in mind the builder may have to order in the PCBs, which can take 2-3 weeks)

You might want to ask about panel colour, knobs and LED colours too, whynot? Some of these builders offer custom panels.

Possibly ask around on social media to see if others have had a good experience with this builder.

In no particular order –
